

## Backlighting caesarstone® Concetto®

Each of the semi-precious stones used in Concetto has distinctive physical characteristics. Translucent stones can be backlit to enhance their beauty.

Technical advancements in lighting allow for evolving expressions of ideas and forms. With this in mind, we recommend Evo-Lite™ as a preferable resource in determining the best lighting technology for your backlit application.

Backlighting Concetto unveils the true beauty this product has to offer.

LumiSheet™ offered by Evo-Lite™ is the perfect solution for backlighting of Concetto. Its slim profile and ease of customization allow for easy integration into the wildest of designs. LumiSheet™ allows for slim, even illumination without the need of space associated with other lighting technologies. Evo-Lite™ focuses their attention on evolving lighting technologies. You can be sure that if new technologies arise, Evo-Lite™ will know about it. This resource has and will continue to support Concetto's quest to provide the most unique and effective light source for the backlighting of Concetto's translucent products.

### INTEGRATION / INSTALLATION OF LUMISHEET™

1. Please contact Evo-Lite™ during the conceptual phase of your project for design and technical support. Evo-Lite™ will help you gain a full understanding of LumiSheet™ to allow your creative juices to flow.
2. Installation can be as easy as overlaying Concetto directly ovetop of the LumiSheet panel. Depending on the translucency of the stone being used, different formats of LED placement within the LumiSheet™ panel can be used to maximize light output. This may require testing of your particular product.
3. LumiSheet™ can even be integrated into an existing design element without the need for major renovations. It's slim profile (6MM and 8MM), fully customizable in shape and size up to 59" x 118", and a life of over 50,000 hours are a few of the attributes that prove LumiSheet™ is the perfect lighting solution
